

Zion temple project

Zion Temple Church website project its goal is to establish an accessible and informative online presence for Zion Temple Church, catering to its existing congregation and welcoming new visitors. The site provides essential details about the church's identity, activities, and ways to connect.

The website is designed with a consistent layout across its core pages, featuring a header with navigation, a main content area specific to each page, and a fixed footer containing essential contact information. The main pages include:

Home(HOME.html): Serves as the entry point, providing a welcoming message, highlighting key aspects of the church (outreach, global presence), featuring a video message from the pastor, and showcasing the youth ministry. It also includes a navigation bar for easy access to other sections.

About Us (about.html): Details the history and vision of Zion Temple Church, including its origins with Apostle Dr. Paul Gitwaza, location details with a link to Google Maps, and contact information. It also features an introduction to the senior pastor and optional service hours.

Ministries (MINISTRIES.html): Introduces the church's various ministries, currently focusing on the Youth Group with contact information and an image. This page also outlines the overarching vision of Apostle Dr. Paul Gitwaza and includes a placeholder for the church's core beliefs.

Sermons (SERMONS.html): Currently a placeholder, this page is intended to host recordings of past sermons in the future.

Events (EVENTS.html): Also a placeholder, this page will likely list upcoming church events and gatherings.

More (More.html): A general section intended for additional information such as testimonials, news, or volunteer opportunities.

And this all about my project of church is to update the christians on the information of the church and other people who wants to join the church by telling them the vision, mission, upcoming events, our beliefs and some memories of the church and future plans of the church
